Engineering (CSE)

1

Introduction

- The **Food Ordering website** can be defined as a simple and convenient way for customers to purchase **food online**, without having to go to the **restaurant**.
- This **system** is enabled by the internet it is the internet that connects the **restaurant** or the **food** company on one hand, and the customer on other hand.
- By using this system, the customer visits the restaurant's website, browses through the various food items available there and then selects and purchases the items he or she needs.

2

Objectives

- Our determination is to develop a reliable, convenient and accurate Ordering System.
- Our system will surely satisfied the customer service.
- We are making this system to accommodate restaurants to take huge amount of orders at a time.
- Main motivation to make this system is to improve the communication between the client and the server and minimize the time of ordering.

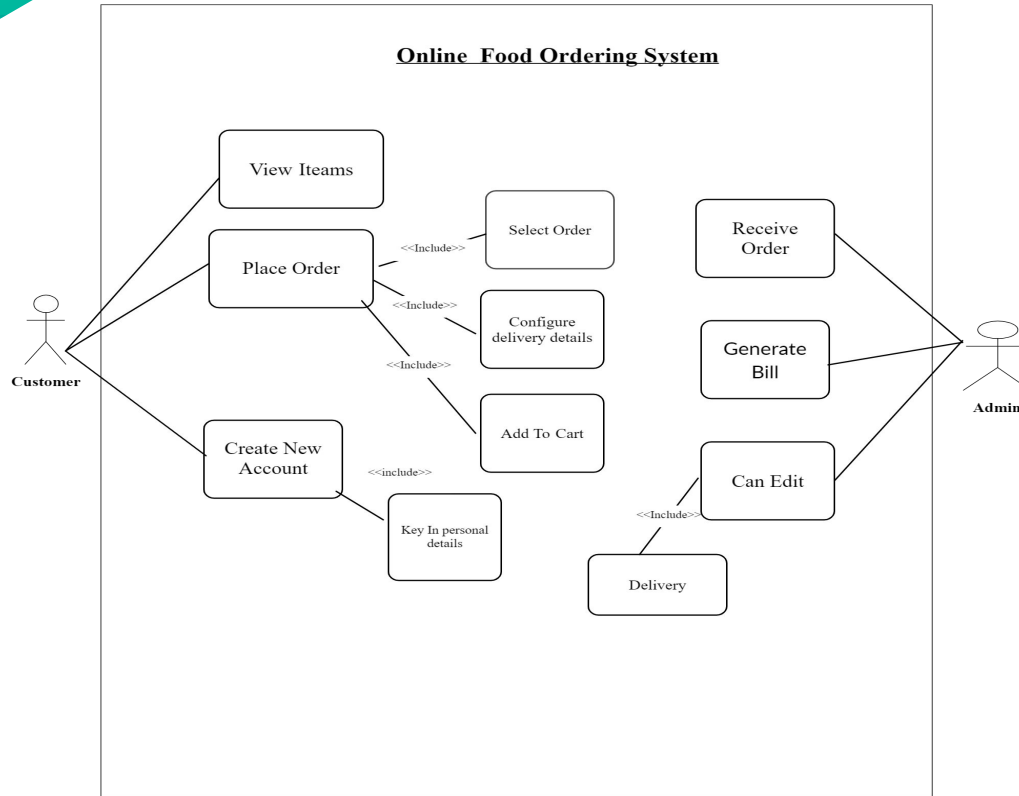

3

Description of the system

Basic Features

- Users can log in to the website with their mail id.
- There will be different food categories and items.
- Visitors can browse/search for their desired food.
- Selected food items will be added to the cart.
- Visitors have different contact options: Phone number, mail, FB page, Instagram, Twitter.
- There will be a Dashboard.
- Admin can perform various activities (add/ update/delete food, manage/track food delivery).
- There will be a feedback form so that customers can give feedback.
- Online payment system.
- Order confirmation mail.

Software Specification

We will use

- Drawing Tools: [Draw.io](#), [Lucid Chart](#), [Creately](#) etc.
- Documentation Tools: [Google Docs](#)
- Presentation Tools: [Google slides](#)
- Database Management Software: [XAMPP](#)
- Web development language: [PHP](#)
- Web Designing language: [HTML](#), [CSS](#)
- Framework: [Laravel](#)
- Software: [VS Code](#)

5

Conclusion

- In conclusion we can say, this website will help customer in making order easily. It gives information needed in making order to customer.
- This system for online food delivery is completely safe, secure and is a very popular method that is revolutionizing the way in which the food industry operates.
- The food ordering website can help admin in controlling all the food ordering system.

The background of the slide is a repeating pattern of a green circuit board. The pattern consists of interconnected lines and small circles, creating a dense, maze-like texture. The color is a vibrant green. The pattern is visible across the entire slide, with some areas being slightly more saturated than others.

Thank You!
